

# Snap-tite 71 Series

High Pressure, Push-to-Connect  
Non Spill-Quick Couplings

## Heavy Duty with Superior Flow and Versatility

Parker's Snap-tite 71 Series couplings are designed for working pressures up to 10,000 psi. Available in a variety of materials and with a wide range of body sizes.

Air inclusion and fluid loss are minimal with the flush face valves. Large flow chambers in the body and an exclusive valve design permit superior flow while maintaining low pressure drop.

\*Hex dimensions are taken from flat of hex and not across corners. Hex may be substituted with round stock. Hex column would then indicate dimension taken across wrench flats.

Decimal dimensions are ± .06 in. (1.5mm)

Dimensions are subject to change without notice.

Part configurations are typical and do not necessarily represent actual appearance.

††Note: 1/4" thru 1-1/4" are flush face couplings. 1-1/2" & 2" maintain a recessed face on coupler half.
